[OpenVAS 7 Released – Open Source Vulnerability Scanner](#)

The screenshot displays the OpenVAS 7 web interface for media management. The left sidebar shows a tree view with 'Media' selected. The main area features a table of VTL volumes with columns for Volume Name, Online status, Slot, Vol Bytes, Vol Usage, Vol Status, Pool, Media Type, and Last Written. The 'Vol Status' column uses color coding: green for 'Append', yellow for 'Used', and red for 'Error'. A filter section above the table allows for searching by Media Type, Status, Limit, Name, Pool, Location, and Expired status.
