ca reports After Monday's team off day, the plan to check in on Estrada prior to Tuesday's game against the Braves to see how his strained left glute responded to the flat-ground throwing session.. (hip) played catch Sunday and could throw a bullpen session Wednesday, Arden Zwelling of Sportsnet.. After a rough first two months of the season, Estrada has been effective since the beginning of June, posting a 2.. If Estrada reports no renewed pain, he'll likely resume mound work Wednesday and could be cleared to start Friday or Saturday against the Red Sox.. (elbow) could return this weekend in Boston, Shi Davidi of Sportsnet ca reports He threw about 20 pitches in the bullpen Tuesday and said it felt normal and he was able to really unleash without pain.

Davidi simply says the ' aim is for Tepera to pitch this weekend in Boston, so that could simply mean a side session, but considering he was able to throw at full intensity, it seems possible we see him in a game.. It's unclear if he will be used in a save situation initially after coming off the disabled list.. 90 ERA and 28:8 K:BB in 31 innings over his last six starts
